

Depending on the age and exposure to the elements, your Aquascape decorative fountain's paint may need to be touched up over time. Your local paint store can use the color tile provided to color match the paint on your fountain. If you do not have a paint tile call customer service @ 866-877-6637 for a matching paint tile.

**IMPORTANT:** You will need to purchase an outdoor/exterior latex-based paint.

We recommend the following steps:

1. Wash your feature thoroughly to remove any sludge, hard water buildup, and small debris.
2. Let the feature dry completely.
3. Using a course all-purpose paint brush, paint the feature from side to side.
4. A foam brush can be used to get paint into hard to reach and recessed areas.
5. Allow paint to dry 3-4 hours and go back over the feature and touch up any areas needed.
6. Let paint dry for 24 hours before using.

*For all fiber-resin products (Stacked Slate Urns, Walls, Spheres, Rippled Urns, Scalloped Urns, all Patio Ponds)*
